And a special event permit shall be revoked upon the following conditions:

- A. In the event that the chief of police, fire chief, other city officials or their designated representatives find that any of the provisions of this article, another city ordinance, or state law is being violated, they shall immediately notify the city administrator or designee and chief of police who shall investigate such matter and, upon finding that such violation has occurred, revoke such special event permit; or

(a) When a special event is partially or fully contained on the city rights-of-way or property, the applicant for a special event permit shall furnish the city administrator or designee and police chief with a certificate of insurance complying with standards established by the city and include the City of La Vernia as additional insured.

Sec. 34-317. Indemnification.

Nothing herein shall preclude the city from enforcing any legal or equitable remedy against the permittee in addition to the security deposit

Sec. 34-319. Police Services; Additional Costs.

1. The chief of police shall establish standards used to determine the level of police services

reasonably necessary for the special event. Traffic control, public safety, considering the size, location, duration, time, and date of the special event, and the need to detour or preempt citizen travel and use of the streets and sidewalks for an event, are all factors which will determine the need for and the quantity of certified/uniformed peace officers necessary to provide reasonable public safety precautions for any event. While ensuring the public safety for special events is the responsibility of the sponsoring organization, the Police Department will determine the minimum necessary to obtain a permit to conduct the event. The sponsoring organization shall pay for any cost related to providing for public safety. Public Safety personnel (Police, Fire & EMS) assignments may be staged to allow for traffic control before and after an event and the number of personnel may be staggered to allow for arrival and departure of attendees. A schedule for the event, the number and type of personnel necessary and the hours on site is required; as well as, an itinerary for the event. Subject to considerations such as the availability of alcohol and other safety factors, generally two (2) peace officers are necessary for the first 500 people and one (1) officer for every additional 500 participants. Fire and EMS personnel will be determined based on the event.

2. The chief of police shall also consider whether the event can take place without disruption of ordinary police services or compromise public safety. All police services shall be first provided by the La Vernia Police Department unless prior written approval is given by the chief of police for the use of outside agencies. The applicant shall pay for the use of any law enforcement equipment devoted to the event by the City and shall pay for off-duty police officers necessary at rates consistent with established departmental off-duty rates, as amended. The applicant then shall have the duty to secure the police services deemed necessary by the chief of police.

3. In the event the city administrator or designee determines that a special event may require the special attention and involvement of city personnel or facilities, the city administrator or designee shall so notify the applicant. In such event, prior to the issuance of a special event permit, the applicant and the city administrator or designee shall agree upon the cost associated therewith. Prior to the issuance of a special event permit, the applicant shall agree to pay a deposit of anticipated costs to the city and shall agree in writing to pay any additional costs to the city within five days of the date upon which the city informs the permittee of the amount of such additional costs. Any permit issued shall be void if the permittee has not paid all fees owed prior to the day before the special event.

Sec. 34-320. Offenses and Penalty.

(a) Violations of the provisions under this article are hereby deemed violations of ordinances, rules, or police regulations that govern fire safety, zoning, and public health and sanitation.

(b) Persons who shall violate any provision under this article, or shall fail to comply with any of the requirements thereof, or who shall fail to comply with the directive of the city official charged with the responsibility of enforcing the provisions of this article, or of a permit or certificate used under provisions of this Code, shall be guilty of a misdemeanor and, upon conviction thereof, shall be punished according to the general penalties imposed for violations of ordinances, rules, or police regulations that govern fire safety, zoning, and public health and sanitation as described under V.T.C.A., Local Government Code § 54.001. Each day that such a violation is permitted to exist shall constitute a separate offense.

This street selection is based off the pavement evaluation done back in June of 2020. These selections take into account street score, ride condition, and distresses associated with each street. Some of these streets will be preservation, and mill & overlay. For preservation, this will consist of base failure repair, crack seal, and a sutiabe sealant for the street. Mill & overlay will consist of base failure repair, and removing the top 2 inches and replacing with hot-mix if the pavement is thick enough. **Please let me know what you think of these selections**, or if there are any you want to take out and replace with another street. I will have to check any selections first (out in the field) for recommendation on improvement since the pavement evaluation was done back in June of 2020.

Any type of thrust restraint that is required to properly prevent pipe movement shall be provided by the customer. Any engineering necessary for the design of the restraint shall also be the responsibility of the customer.

Equipment Support Block

Support of our equipment at the line stop location may be required. This typically consists of a concrete support block placed under and around our line stop fitting to carry the loads imposed on the pipe by our equipment. Consult with your sales representative for clarification.

Suspension of Flow

Customer must provide suspension of flow at the time the line stop head is inserted into the line. Pressure may be maintained, but flow must be stopped. Consult with your sales representative for clarification.

Chlorination

It will be the customer's responsibility to provide any chlorination services that may be required. This applies to any equipment, bypasses, or fittings that are related to the line stop process. Requirements for flushing must be discussed before prior to the line stop being scheduled.

Blow Down and Draining

After the line stops have been set, it will be the customer's responsibility to blow down the line and drain its contents in a safe and controlled manner.

Leakage

Due to various internal piping conditions, a 100% seal on the line stop may not be possible. Koppl will attempt to obtain the best seal attainable given the conditions, but no guarantee can be made as to the quality of the line stop. The customer must be prepared for containing and working with any leakage that may occur. Consult with your sales representative for clarification.

Equalization

Equalization of pressure on both sides of the line stop location is required prior to removing the line stop head. A means of equalization must be provided.

Duration of Line Stop

The line stop shall remain in line for the duration stated above. If additional days are required, additional equipment charges may apply.

Prior to our arrival on site, the customer is responsible for removing any existing coating on the pipe. This includes insulation, tape wrap, concrete, tar coating, etc. Any coating containing asbestos will need to be abated before we can begin any work on site.

Welding

If Koppl Pipeline Services is to provide welding services, connection of a welding machine may be necessary. An electrician must be available to connect our portable welding machine to a suitable power source (208 or 480 3-phase, minimum 20 amp breaker). Our truck mounted welding machine may be used if we can park within 200 feet of the job location. If Koppl provides a welder, the customer must provide a fire watch.

Stand-By Time and Overtime

Delays beyond our control will be subject to a charge of \$175.00 per man / per hour for straight time \$250.00 per man / per hour for overtime, after hours, holiday, or emergency projects plus any applicable overtime.

Coupon Retention

Koppl Pipeline Services uses the latest technology for coupon retention, yet there is no guarantee of its retrieval. All costs associated with retrieving the coupon will be the responsibility of the customer.

C900 and PVC Piping

On certain systems, C900 piping might have a tendency to crack and catastrophically fail. Although Koppl follows all industry standard tapping procedures when tapping into C900, there is no way to determine the integrity of the pipe being tapped. If a failure should occur, Koppl shall be relieved of all liability related to the incident.

Prevailing Wage & Project Labor Agreements

KOPPL PIPELINE SERVICES, INC. IS A NON-UNION CONTRACTOR. Customer must notify Koppl, in advance, of any requirement to be signatory to a union in order to comply with a site project labor agreement. We must also be notified to pay prevailing wage rates or to provide certified payroll reports. Requirement to do so shall warrant a requote.

Pricing

Pricing is based on the scope of work described. Any changes to this scope may change unit pricing or total pricing. Please contact us for a new quote if the quantities, sizes, or scope of work is modified.

Site Preparation

Customer is responsible for safe preparation of the work site. For underground work, this may include traffic control, excavation, shoring, permits, etc. For work performed inside of a building or other structure, safe access to the work area must be provided, such as scaffolding, a manlift, or ladders. Please contact your sales representative for detailed requirements depending on the work to be performed.

Pipe Information

Customer must provide accurate dimensional information for the pipe in which the line stopping operation will occur. This will include type of pipe, class, outside diameter, inside diameter, pressure, temperature, etc. If the information is found to be inaccurate at the time the work begins, a re-quote may be required. A brief summary of the work to be performed while the line stop is in line should also be provided.

Thrust Restraint

Any type of thrust restraint that is required to properly prevent pipe movement shall be provided by the customer. Any engineering necessary for the design of the restraint shall also be the responsibility of the customer.

Equipment Support Block

Support of our equipment at the line stop location may be required. This typically consists of a concrete support block placed under and around our line stop fitting to carry the loads imposed on the pipe by our equipment. Consult with your sales representative for clarification.

Suspension of Flow

Customer must provide suspension of flow at the time the line stop head is inserted into the line. Pressure may be maintained, but flow must be stopped. Consult with your sales representative for clarification.

Chlorination

It will be the customer's responsibility to provide any chlorination services that may be required. This applies to any equipment, bypasses, or fittings that are related to the line stop process. Requirements for flushing must be discussed before prior to the line stop being scheduled.

Blow Down and Draining

After the line stops have been set, it will be the customer's responsibility to blow down the line and drain its contents in a safe and controlled manner.

Leakage

Due to various internal piping conditions, a 100% seal on the line stop may not be possible. Koppl will attempt to obtain the best seal attainable given the conditions, but no guarantee can be made as to the quality of the line stop. The customer must be prepared for containing and working with any leakage that may occur. Consult with your sales representative for clarification.

Equalization

Equalization of pressure on both sides of the line stop location is required prior to removing the line stop head. A means of equalization must be provided.

Duration of Line Stop

The line stop shall remain in line for the duration stated above. If additional days are required, additional equipment charges may apply.

Pipe Coating

Prior to our arrival on site, the customer is responsible for removing any existing coating on the pipe. This includes insulation, tape wrap, concrete, tar coating, etc. Any coating containing asbestos will need to be abated before we can begin any work on site.

Welding

If Koppl Pipeline Services is to provide welding services, connection of a welding machine may be necessary. An electrician must be available to connect our portable welding machine to a suitable power source (208 or 480 3-phase, minimum 20 amp breaker). Our truck mounted welding machine may be used if we can park within 200 feet of the job location. If Koppl provides a welder, the customer must provide a fire watch.

Stand-By Time and Overtime

Delays beyond our control will be subject to a charge of \$175.00 per man / per hour for straight time \$250.00 per man / per hour for overtime, after hours, holiday, or emergency projects plus any applicable overtime.

Coupon Retention

Koppl Pipeline Services uses the latest technology for coupon retention, yet there is no guarantee of its retrieval. All costs associated with retrieving the coupon will be the responsibility of the customer.

On certain systems, C900 piping might have a tendency to crack and catastrophically fail. Although Koppl follows all industry standard tapping procedures when tapping into C900, there is no way to determine the integrity of the pipe being tapped. If a failure should occur, Koppl shall be relieved of all liability related to the incident.

Prevailing Wage & Project Labor Agreements

KOPPL PIPELINE SERVICES, INC. IS A NON-UNION CONTRACTOR. Customer must notify Koppl, in advance, of any requirement to be signatory to a union in order to comply with a site project labor agreement. We must also be notified to pay prevailing wage rates or to provide certified payroll reports. Requirement to do so shall warrant a requote.

Pricing is based on the scope of work described. Any changes to this scope may change unit pricing or total pricing. Please contact us for a new quote if the quantities, sizes, or scope of work is modified.
